4-WAY GRID TOWER Assembly Instructions

1. Assemble Grid Panels in pin wheel pattern, using three grid connectors per panel-to-panel connection.

2. Assemble base in pin wheel pattern, using two bolts per side (bolts screw directly into end of adjoining member).

3. Assemble casters on base. (Tighten each caster snugly into base to insure caster will not shear off under load.)

4. Place assembled grid panels on base. Fasten panels to base at tabs with eight bolts and nuts.
